

3M 09018 - Marine Metal Restorer and Polish

Description

- Metal restorer removes rust and corrosion
- Formula reverses the effects of oxidation
- Polish brings out a lustrous shine
- Recommended for stainless steel, brass, bronze, copper, chrome and aluminum
- Paste consistency works smoothly over metal

3M Metal Restorer and Polish restores the sparkle and shine on metals throughout boats. Our polish rejuvenates the beauty of metals by removing surface rust, oxidation, corrosion and tarnish. This easy-to-use paste brings back the original luster to make metals look new again.

3M Metal Restorer and Polish refreshes the beauty of metals that have become dull and tired looking because of surface rust, oxidation, corrosion and tarnish. It's inevitable that time will take its toll on the appearance of metals, but our polish makes it easy to bring back the original sparkle and shine of metals. It does its job by both removing surface contaminants and then polishing metals to a lustrous brilliance. Use this polish to restore the radiance of stainless steel, brass, bronze, copper, chrome, aluminum and other marine metals.

3M Metal Restorer and Polish can renew the appearance of cars, trucks, motorcycles and boats. With so much exposure to sun, UV rays and water, the metals on vehicles are subject to harsh treatment. Originally developed for marine specific metal polishing applications, this product removes oxidation rust and tarnish in a wide array of applications in a one step process.

Package size: 150 ml.
